

One Textile

QUALITY FABRIC IN SHORT DELIVERY TIME
And Full Package

COMPANY PROFILE

BACKGROUND

The company, One Textile, was created in 2010 as a fabric convertor and a wholesaler in Los Angeles. It was mainly formed to sell fabrics to small boutique shops in Los Angeles and New York. During the last four years, One Textile experienced tremendous growth by partnering with a clothing manufacturing who mainly produced clothing with corroboration of CMT companies in Guatemala. We supplied over 7 million yards of Los Angeles-made fabric in 2019 to Guatemala! Our new Guatemala office can serve more customers in GT by partnering with full package manufacturers that need fabrics that cannot be sourced elsewhere.

OUR VISION

In One Textil we expect to be a leading company and a point of reference in the global textile industry, reconized for our ability to offer innovative products and services that combine exceptional quality, speed and sustainability. We wanted stand out in industry standards, giving not only for the excellence of our processes and results, but also for our commitment to the environment and social responsibility. Our goal is to compete effectively with the big industries in the market, consolidating ourselves as the preferred partner of international brands seeking innovation, efficiency and excellence in every detail.

OUR MISSION

In One Textil, we work with passion and dedication to provide a complete package of textile solutions lining up from fabric production to the design and manufacture of finished products. We are committed to providing a comprehensive service to international brands based on high standards of quality, innovation and sustainability, optimizing each stage of the process to ensure efficiency and competitive delivery times. Our priority is to build long-lasting relationships with our customers, providing value through a personalized service and a highly trained team that understands the needs of an ever-evolving global market.

COMPETITIVE ADVANTAGE

The Company has a competitive advantage since a dyeing facility is owned and operated by the same ownership here in Los Angeles. This enables vertical operation with fast production turnaround with quick shipment to cut overseas with CAFTA and NAFTA programs in Mexico and GT.

The company is able to produce all types of fabrics from basic cotton to poly spandex for athletic wears. We are able to use 100% CAFTA yarns or partial CAFTA to provide fabric with a strategic advantage. The company is able to supply large amount of fabric in short time as well as small batches to fulfill all of customer's needs rapidly to take on any type of order.

PRODUCT LINE

OUR PHILOSOPHY

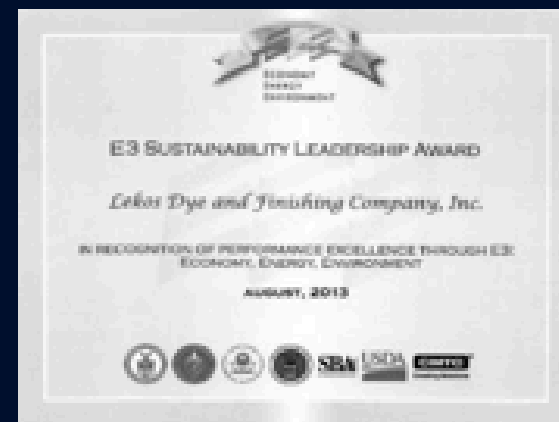

We believe.

Manufacturing products in the **United States** enables us to respond to customer needs faster.

From rapid prototyping, to quickly adapting our supply chain,
to welcoming customers on-site to experience our production facilities,
we are able to provide the highest quality products and services while living our **beliefs**.

OUR RECOGNITION

We care, so we do.

One of our most important brand pillars is responsible **environmental stewardship**. Incorporating methods to reduce consumption and minimize carbon footprint has been an integral part of our business model since our inception.

ONE TEXTILE LOCATION

We are conveniently located in Los Angeles, California. As buyers and producers in the US are concentrated in New York and Los Angeles, we are able to accommodate US-based customers with the option to produce large amounts of trendy fabric in short lead time. We are also able to better communicate with the final buyer prior to CMT for quality confirmation for an attentive process. The location makes that company to do businesses with Hollywood celebrities and sell to boutique stores in Beverly Hills. This offers us an insight into the fashion trend and develop novelty fabric with lower costs with manufacturing infrastructure.

Our office in Guatemala allows us to better serve customers by quick responses and being able to carry inventory at our warehouse. We also have production capacity to operate with factories in Guatemala.
